

To be read in conjunction with site-specific Covid risk assessments

This Risk Assessment

This risk assessment has been produced as an overview corporate level risk assessment, based on current Government and CLC guidance. This should be used as a starting point to assist in the day-to-day management of specific construction sites and be supplemented by site-specific Covid risk assessments (including head office and satellite office assessments).

This risk assessment will be reviewed on a regular basis by the Senior Management team at PMC, specifically when any changes to the above published guidance are issued. Further advice will be sought from MSAFE Risk Management who will also be available to assist with site-specific risk assessments and site-level queries as required.

All persons working in an office or on a site are to be briefed on the contents of this Risk Assessment to ensure they understand how to follow the control measures as outlined in the table below. Operatives working for Subcontractors must also work in conjunction with their employer's Covid risk assessments, and follow safe working systems when on site, not only to ensure they are able to follow Covid control measures, but also to ensure tasks can remain to be carried out safely whilst observing the same.

Guidance and Training

Persons working on site will be required to undergo formal Covid training / briefings / toolbox talks.

Risk assessment review by: S Cripps & M McGee of PMC | Date: April 2022

Site/Project: General assessment of all sites and offices

For further guidance please see: [CLC Guidance](#); [Working safely during Covid-19 in construction and outdoor work](#)

Activity: Working during the Covid -19 pandemic – Foreseeable Hazards

What are the hazards?	Who might be harmed & how?	What are you already doing/propose to do?	Additional measures required to control this risk.	Action by who?	Action by when?
Exposure to Covid-19 virus during working day	Vulnerable persons, persons on site, any other persons who come into contact with asymptomatic carrier	Information given to all persons on site and instruction to stay away from work and isolate if they are symptomatic Temperature checks on arrival to site	Carry out a site-specific assessment to identify and outline individual site requirements	S Cripps M McGee Project / Contracts Managers Site Managers MSAFE	Ongoing
Lack of social distancing	Vulnerable persons, persons on site, any other persons who come into contact with asymptomatic carrier	Sites to operate one-way system where practical and when safe to do so Welfare facilities to be open to reduced numbers with clear spacing marked out / urinals closed Programme / sequencing of works to be reviewed by Project & Site Managers, with individual tasks to be reviewed by subcontractors Meetings and non-essential site visits to be put on hold or held over, video / conference call Signage to be displayed / permit system operated for workstations / areas, as directed by site-specific risk assessment	Carry out a site-specific assessment to identify and outline individual site requirements	S Cripps M McGee Project / Contracts Managers Site Managers MSAFE	Ongoing
Poor hygiene	Vulnerable persons, persons on site, any other persons who come into contact with asymptomatic carrier	Hand-sanitising gel to be available on entrance points and at strategic locations around the site Heightened cleaning regime	Carry out a site-specific assessment to identify and outline individual site requirements	S Cripps M McGee Project / Contracts Managers Site Managers MSAFE	Ongoing
Welfare areas / shared touch-points	Vulnerable persons, persons on site, any other persons who come into contact with asymptomatic carrier	Heightened cleaning regime Rotation of breaks / staggering of numbers permitted to enter welfare areas	Carry out a site-specific assessment to identify and outline individual site requirements	S Cripps M McGee Project / Contracts Managers Site Managers MSAFE	Ongoing
